

Autonomous Solar Kit

Electricity Everywhere!

Autonomous Solar Kit 5 kW

- ▶ Become self-sufficient in electricity!

This solar kit is designed for a daily consumption of 20 kWh. Supplied with 20 solar panels (roof/ground mounting included), 250 w, 25-year warranty, 1 MPPT controller that can be connected to the generator to charge the batteries on cloudy days, 1 inverter, 8 x 250 AH batteries, 6 pairs of connectors and 100 meters of cable.

Specifications

- ▶ **Solar panel:** 20, polycrystalline, 280 W
- ▶ **Contrôleur:** PV 48V 40A
- ▶ **Inverter:** 8 KW Off Grid Inverter with MPPT Controller
- ▶ **Batteries:** 8 solar batteries 12V / 250 AH with cables
- ▶ **Support:** Roof/ground mounting bracket for 12 solar panels
- ▶ **Cable:** 100 meters of BV-1 x 6 international standard cable Series
- ▶ **Connector:** 6 Terminal connectors for connecting panels in parallel
- ▶ **Accessories:** Mounting accessories included
- ▶ **Warranty:** 25 years for panels, 5 years for controller, inverter and batteries
